

Shaping the Future of Technology *Through Ethics*

IEEE
EthicsWeek™

12-20 September 2026

The IEEE Society on Social Implications of Technology (SSIT) proudly invites you to participate in the inaugural IEEE Ethics Week—a global celebration of ethical innovation, responsible technology leadership, and meaningful engagement across the IEEE community. As technology continues to transform every aspect of our world, IEEE Ethics Week creates a space for important conversations about the ethical questions and challenges associated with technological development and its impact on society.

AREAS OF FOCUS

- **Ethics of Technology:** Ethical considerations in the design, deployment, and use of technology
- **Research Ethics:** Integrity, transparency, fairness, and responsible research practices
- **Professional Ethics:** Accountability, leadership, and adherence to the IEEE Code of Ethics
- **Ethics in Education:** Preparing future engineers and technologists to address ethical challenges
- **Ethics in Public Policy:** Exploring how ethical reasoning informs technology-related policy decisions

We encourage all IEEE units to participate in Ethics Week by: hosting panel discussions, webinars, or workshops related to the areas of focus; promoting upcoming ethics-related events happening with your unit; and sharing relevant educational materials, articles, and other resources you have developed.

Join the Global Conversation on Ethical Innovation

PARTICIPATE • VOLUNTEER • ORGANIZE • COLLABORATE
